Resident Living Areas (The Neighborhoods)

Dania Home is a Residential Care Facility with 102 beds, 6 of which provide Respite accommodation.

Each neighborhood has 17 rooms and the building is divided into 2 floors. Residents have the ability to stay in their neighborhood for bathing, activities, lounging and meals. The dining area is furnished for resident comfort and needs where three nutritious meals are served (hot meals are served). Staff is designated to the same neighborhood on a permanent basis. This allows the residents to get to know their care providers and experience continuity of care. There is a large multi-purpose room on the main floor that may be used for special events, birthday parties and other social activities.

Supporting Residents to Live at Risk

Dania Home follows the Fraser Health Clinical Practice Guideline which supports residents to live at risk in residential care.

The guideline provides a framework used for decision making to requests to live at risk. For more information speak to the Nurse.

Disclosure of Resident Safety Incidents

Dania Home provides full and timely disclosure of resident safety incidents to residents / substitute decision makers. If the resident is incapable of understanding a discussion of this nature, then in accordance with the Health Care Consent Act, the resident's substitute decision maker (SDM) is informed. Residents and their substitute decision makers have the right to decline disclosure.

Advance Care Planning

An Advance Care Plan is a written summary of a capable adult's advance care planning conversations and wishes to guide their substitute decision maker or representative, if they are called to make a health care decision in the event the adult is incapable of making decisions.

Advance Care Planning is a process of personal reflection and then action. Individuals consider what makes their life meaningful and what circumstances might change their

goals of care from aggressive medical treatment to comfort. This reflection helps identify the values and beliefs around living well and end-of-life issues that are important.

In British Columbia an individual can only make an Advance Care Plan for themselves. No one can make one for someone else. The person making the Advance Care Plan must be an adult, **at least 19 years old**, able to understand the kind of health care choices he or she is making and what they mean. The person must also be **capable**. Under the **Health Care (Consent) and Care Facility Admission Act** all adults are presumed capable until the "...contrary is demonstrated." Dania Home will support any capable resident that may wish to develop an Advance Care Plan.

For more information on Advance Care Planning please speak to your Care Coordinator or consult **The Ministry of Health Services** My Voice Guide.

Medical Orders for Scope of Treatment

Medical Orders for Scope of Treatment (MOST) is a physician order based on Advance Care Planning conversations with a capable adult or their substitute decision maker(s).

It is important to note that as per the requirements of Fraser Health Licensing to promote the health, safety, dignity and rights of persons in care, no resident will be denied admission and it will not be a requirement for admission to have the resident or someone on their behalf to make health care decisions on admission and on an ongoing basis.
