QUALITY IMPROVEMENT INITIATIVES

New Murals in the Dining area and Hallways

Archaeologists working in Denmark's Jutland peninsula have discovered the foundation and remains of a great hall from the high Viking Age.

Structural features and remains date to between the late-9th to 11th century, but mostly from the era of Denmark's king Harald Blåtand Gormsson, known colloquially as

Harald "Bluetooth" from which the modern technology derives its name.
