WED, AUG. 23RD

Archaeologists working in Denmark's Jutland peninsula have discovered the foundation and remains of a great hall from the high Viking Age.

Structural features and remains date to between the late-9th to 11th century, but mostly from the era of Denmark's king Harald Blåtand Gormsson, known colloquially as Harald "Bluetooth" from which the modern technology derives its name.

40 metres long x 8-10 metres wide
